

Carbon Neutral Program

Site 108 & 142	Eudunda, South Australia
Protection	100 years
Registered on Title	Yes, October 2009
Planted	2008 and 2009
Method	Direct Seeding
Target	2008 Planting 5100 plants 2009 planting 8500 plants
Audit due	2008 planting October 2011 2009 planting October 2012
Funded by	Brown Falconer, Grosset Wines, Rotary Club of Adelaide, Medical Board of South Australia, BMW Group Australia, Voyager Estate, Savings & Loans Credit Union (SA), Eco Pest Control, Detmold Packaging Group, Hahndorf Hill Winery, Office Corporate, Watershed Protection Office, wedding, Derek O'Reilly, Amanda Parkinson, Alexis Wadsley, Elizabeth Percival, Rebecca Abbott, Glenys Perri

Planting location on site:

Site details

Trees For Life representing Carbon Neutral revegetated 16ha of this 160ha Eudunda property over a 2 year period. The revegetation follows ephemeral creek systems running through the property and will help protect against erosion, link scattered remnant vegetation and provide biodiverse habitat for flora and fauna including an isolated population of wombats and echidnas which inhabit the property.

Species Planted on the Site:

Acacia sp. argyrophylla, calamifolia, hakeoides, ligulata, macrocarpa, paradoxa, pycnantha, Allocasuarina verticillata
Callitris gracilis
Dodonaea viscosa ssp. angustissima
Pittosporum phylliraeoides
Senna artemisioides mixed species
Eucalyptus sp. brachycalyx, gracilis, odorata, oleosa, porosa, socialis
Melaleuca lanceolata

Site Update, June 2011:

The site inspection carried out in June revealed a tale of two distinctly different seasons. 2008 presented extremely dry conditions throughout the year including spring and summer, resulting in a very poor establishment of seedlings in that year's seeding areas. 2009 season was much better and was followed by magnificent rains during 2010 and early 2011. This resulted in good germination, establishment and growth of the seedlings.

Remedial works

To redress the short fall in projected numbers of seedlings required in the area planted in 2008, Trees For Life will carry out 13.5km of direct seeding using 6.5kg of seed in winter 2011.
