

Trees For Life
Carbon Neutral Program
Planting Site 2009

Mt Torrens, South Australia

Located 3 kilometres north of Mt Torrens in the Onkaparinga Valley, this Carbon Neutral planting comprises 6 hectares of gently sloping revegetation reflecting *Eucalyptus camaldulensis* woodland in the Angus Creek catchment. This revegetation will buffer remnants in the adjoining property and along the decommissioned railway corridor and enhance biodiversity outcomes for the area.

Above: An aerial photograph showing the planting area buffering and linking remnant vegetation around the property

Note to Glenys: remove purple land parcel numbers

Planting Dates:

Direct Seeding was undertaken on 19 October 2009.

Above: *Eucalyptus camaldulensis* establishing in direct seeding rows (photo taken 13-Jan-2010)

Species planted on site:

Acacia sp melanoxyton, myrtifolia, paradoxa, pycnantha, retinodes (hill form)

Allocasuarina verticillata

Bursaria spinosa

Dodonaea viscosa spatulata

Eucalyptus sp: camaldulensis, fasciculosa, goniocalyx, leucoxyton, viminalis cygnetensis

Leptospermum continentale

Carbon uptake:

This site currently requires Development Approval before it can become a carbon sequestration site and protected from clearing..

Carbon Offset subscriptions status:

Revegetation on this site is being funded by the Scunthorpe Forest Collective.
